

Daniel Rosenthal

BSc, MSc, MIP, CPA, FIPTA

Associate, Patent Attorney

Joined Griffith Hack:	2001
Qualified as UK Patent Attorney:	1997
Qualified as AU Patent Attorney:	2003
Experience in Profession:	14 years
Email:	daniel.rosenthal@griffithhack.com.au

Academic Qualifications:

Master of Industrial Property – University of Technology, Sydney
Master of Science in the Management of Intellectual Property – University of London
Certificate in Intellectual Property Law – University of London
Bachelor of Science in Physics (with Philosophy) – University of York

Experience:

Daniel is a patent specialist, working mainly in the mechanical and electrical fields. He worked for several years in the publishing arm of the British Institute of Physics before studying intellectual property law and embarking on a career as a patent attorney. Daniel brings a practical approach to patent work in the mechanical field and his physics background equips him to deal with related high-technology areas and complex subject matter.

Daniel was awarded his Masters in the Management of Intellectual Property from the University of London in 1993 and started with a British firm of patent attorneys in the same year. He worked in the UK for several years and rapidly qualified as a UK Chartered Patent Attorney (CPA) and European Patent Attorney before moving to Australia.

Daniel joined the Brisbane Office of Griffith Hack in 2001 and is an Australian registered patent and trade mark attorney. His practice includes both Australian and overseas clients, but is primarily focussed on locally originating patent work, and includes a great deal of inventor contact. Daniel's wealth of IP qualifications, his current locally-based practice and his significant overseas experience have resulted in extensive experience and considerable expertise in preparation and prosecution of Australian, International, UK and European patent applications. Daniel also has substantial experience in other areas of IP including registered design and trade mark matters.
